Best Values on the Market

INTRODUCTORY

WE take pleasure in presenting herewith our new catalogue in the hope that it will be a business-getter for you as well as ourselves. We have aimed to make it a distinctive design book showing the most popular designs and best values on the market. We have added a number of new designs, and for these we invite your special consideration.

In examining the following pages we want you to bear in mind that we are **MANUFACTURERS** producing our own goods of a uniform and dependable quality.

We respectfully invite your correspondence and will be pleased to figure your plans on this class of work; send us rough sketch and we will submit prices for your approval. In soliciting your patronage we wish to assure you that every possible attention will be given your inquiries, and we hope by courteous treatment and square dealing to merit your esteemed orders.

Yours respectfully,

HEATON & WOOD,

1706 CHESTNUT STREET,
PHILADELPHIA, PA.

INSTRUCTIONS

Grilles are made of $\frac{7}{8}$ -inch thickness unless otherwise ordered.

All Grilles, circular or irregular shaped, are measured as if square.

Send accurate measurements for all spaces, and for circular and irregular openings, send a good paper pattern, carefully rolled.

If finish is desired to match color of trim already in place, a sample will be required.

For all arch Grilles and Colonnades give exact width and height of opening.

Grille drop will be the same as stated with illustration, but can increase Grille drop on any design at a slight advance in cost.

When in doubt as to what kind of wood, take oak.

Oak is always appropriate anywhere.

Be sure and state what kind of wood.

Send in your order early and we will hold and ship as instructed.

ABOUT OUR FACILITIES

We operate our own dry kilns, and treat all lumber for our particular class of goods, thus assuring the best kiln dried lumber obtainable. Our machine room is equipped with the latest modern machinery and the cabinet room is operated by the best skilled cabinet makers so every part is perfectly fitted and well manufactured.

GUARANTEE

We guarantee all goods exactly as represented. All workmanship and materials guaranteed to be the best of the kind ordered.

Description of Colonnades

Columns are 6 inches in diameter tapering to 5 inches at neck. Pedestal height 20 inches and width or extension from jamb is made in proportion to the size opening ordered. Made for 5 $\frac{3}{4}$ -inch jambs. Top shelf on pedestal is 10 inches wide. We furnish the baseboard shown on pedestals, this baseboard is sent separate so as to allow you for proper fitting when setting pedestals in place. This baseboard is made special to conform with other lines on pedestals, making pedestals uniform in design.

ADJUSTABLE GRILLES

Herewith we show a line of our patent adjustable grilles. These patent grilles will not break or crack in the scroll work. No matter which way the opening may give after the grille is set up; the grille will also give and will not break or crack scrolls owing to the adjustment of balls and dowels on each side of center section. This is a point one should consider when purchasing grilles.

Anyone who can handle a hammer or screw driver can set these grilles up in place as there are no shavings to be taken off or fitting to be done, simply set up the two side sections and then the center and adjust ball and dowel on each side of center section.

We carry these grilles in stock in oak or yellow pine, to fit any opening from 4 feet to 8 feet.

Guaranteed to be made of the best kiln dried lumber, will not shrink or crack in scrolls.

Grille drop always the same as stated at side of design.

These cuts are made from photographs and show exactly all scrolls and spindle work used in the construction of these grilles.

Cut below shows grille in three sections as it comes to you.

Cuts on opposite page show grilles when set up.

This illustration shows construction of our patent adjustable grilles, which are made in three separate sections and connected by balls and dowels.

Special Loose End Grilles

The following three Grilles are made with loose end (see design No. 225-2 showing loose end piece). These Grilles can be cut down to any required length. For example, to make a 5 ft. 6 in. Grille take a 6 ft. length and cut off 3 inches from each side, slip on the loose end and you have the length wanted.

We suggest that you put in a stock lot of these Grilles, two of each in 5 and 6 ft. lengths and one of each in 7 ft. We assure you it will be to your interest to put in this lot, so you can make immediate deliveries when contractors ask for Grilles, as we know considerable business can be had from your trade providing prompt deliveries can be made.

We furnish these Grilles in any length but can make immediate shipments in lengths of 5 ft., 6 ft. and 7 ft. Oak or yellow pine in the white.
